1. COUNTRY HIGHLIGHTS

In Austria, over seven in ten respondents (71%), consider climate change to be a very serious problem, an increase of three percentage points (pp), but below the EU average 79%. More than a quarter (27%) see it as the most serious problem facing the world, an increase of 11pp since 2017, and above the EU average of 23%.

Two thirds of respondents say that they have personally taken action to fight climate change in the past six months (66% vs the EU average of 60%), an increase of six pp since 2017. When given specific examples of actions, which count as climate actions, the proportion increases to 92% (vs the EU average of 93%).

• Compared with 2017, respondents in Austria are now twice as likely to say they have installed equipment in their home to control and reduce their energy consumption (16%, equal to the EU average of 16%).

More than eight in ten respondents in Austria agree that more public financial support should be given to the transition to clean energies even if it means subsidies to fossil fuels should be reduced (82% vs the EU average of 84%), though this represents a slight decline of three pp since 2017.

A large proportion of respondents agree that their national government should set ambitious targets to increase the amount of renewable energy used by 2030 (90%, just below the EU average of 92%), and that it is important for their national government to support increased energy efficiency measures (85% vs the EU average of 89%).

The proportion who agree that adapting to the adverse impacts of climate change can have positive outcomes for citizens is 67%, just below the EU average of 70%. Respondents in Austria overwhelmingly agree that greenhouse gas emissions should be reduced to a minimum while offsetting the remaining emissions, in order to make the EU economy climate neutral by 2050 (87%, under the EU average of 92%).

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QB1a Which of the following do you consider to be the single most serious problem facing the world as a whole?
(%)

QB1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
