

Malta's feedback in accordance with Article 21 of the NZIA

Article	Request	Feedback
21 (1) (a)	Make publicly available data on all areas where Co2 storage sites could be permitted on their territory	Nil – Currently Malta does not have suitable CO2 storage sites which could be permitted.
21 (1) (b)	Oblige entities which are or have been holders of oil and gas production authorisations as defined in Article 1, point 3, of Directive 94/22/EC on their territory to make publicly available on a non-reliance basis geological data relating to production sites that have been decommissioned or whose decommissioning has been notified to the competent authority	Nil – Malta has no production sites that have been decommissioned or whose decommissioning has been notified to the competent authority, therefore we do not have any data to provide.
21 (2) & (3)	A mapping of CO2 capture, transport and storage projects in progress, with expected permit and FID dates; Any national support measures, national strategies and targets that have been or will be adopted; Any cross-border cooperation for CO2 transport & plans to facilitate the decarbonisation of industrial sectors, if no CO2 storage projects are in progress on their territory.	(2) Nil – There are currently no CO2 storage projects in progress. (3) Studies are being carried out to process potential storage sites.
