

Fleet Reattribution for Aviation Management or Service Provider Companies identified as Aircraft Operators on the EU ETS Operator List¹.

The purpose of this note is to allow the correct identification of the aircraft operator of traffic currently attributed to aviation management or service provider companies that

- (a) have been invoiced for the route charges of the traffic in question; **but**
- (b) did not operate the flights in question.

Such companies should contact EUROCONTROL directly by email ets.info@eurocontrol.int to request further information on how to proceed.

This service is not to be used by aviation management or service provider companies who operate aircraft on behalf of their clients. If such companies wish to make a Fleet List submission they should use the standard Fleet List form available from http://ec.europa.eu/clima/policies/transport/aviation/operators/index_en.htm

If you are unsure of which situation applies to you, please contact EUROCONTROL at ets.info@eurocontrol.int giving details **on the** type of service and/or operations which your company provides.
