### Transaction fee

The value of the transaction fee is 10% of the market value <sup>(1)</sup> of the free allocations transferred by a relevant Operator holding account <sup>(2)</sup>.

<sup>(1)</sup> The market value is calculated with the EEX-EUA exchange rate of the day the transaction is completed (or if there is no auction on that day then the exchange rate of the last auction), converted at the average [daily exchange rate](#) determined by the Central Bank of Hungary.

<sup>(2)</sup> The transaction fee applies for Operator holding accounts for which:

- the received free allocation in the year preceding the relevant year is equal to at least 50% of the average of the verified emissions of the three years preceding that, and
- the average of the verified emissions in the three years preceding the relevant year exceeded 10,000 tons.
